

## Adding a license key in IAM

Jason Foster - 2021-05-13 - IAM

To use IAM beyond the trial period, you will need to install a valid license key. This key can be obtained from your account representative, or from our support center.

1. Open the application 'IAM - Management Studio'
2. Select **Help** from the top menu bar and click on **License Information**

3. Paste the entire code, including the **BEGIN\_CODE** and **END\_CODE** lines, into the text box

4. Click **Update License**

Your installation of IAM is now fully licensed and functional!
